

Comprehensive Opioid, Stimulant, And Substance Use Program Key Performance Indicator Report

Calendar Years 2021–2022

The Comprehensive Opioid, Stimulant, and Substance Use Program (COSSUP) Key Performance Indicator Report is a programmatic assessment of key metrics. The measures leveraged for this assessment are historically relevant program and emphasize the activities of the program as established in the solicitation. This assessment supports the mission of the Bureau of Justice Assistance (BJA) to promote community safety in relation to the opioid epidemic and provides insight into how the COSSUP program is impacting stakeholders, communities, and individuals throughout the country. The report includes data on several COSSUP priority areas including Naloxone training, law enforcement and other first responder diversion programs, alternative to incarceration programs, substance use treatment, and recovery support services.

COSSUP Funding Highlights

This report summarizes performance data reported by grantees/subgrantees who were active in Calendar Year (CY) 2021 and 2022 comprising:

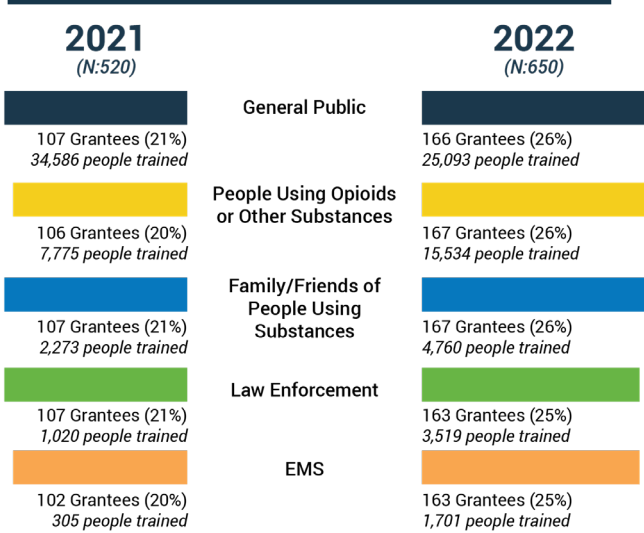

in 50 states, 2 territories (Puerto Rico and Guam), and the District of Columbia.

During CY 2021, 461 grantees (funded in Fiscal Years (FYs) 2017-2022) reported data with 151 subgrantees.

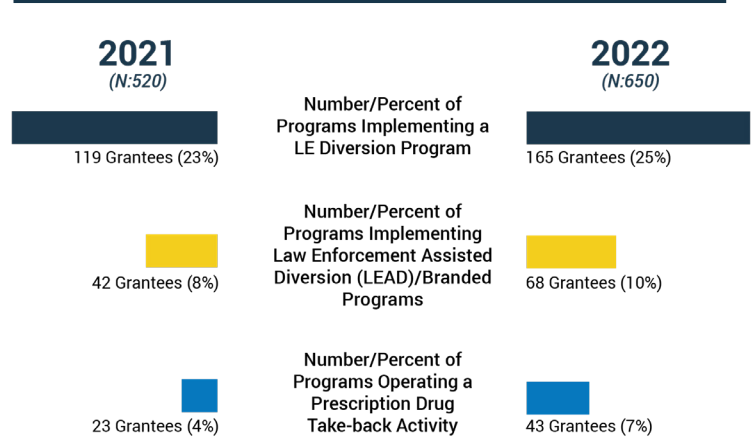

During CY 2022, 491 grantees (funded in FYs 2018-2022) reported data with 250 subgrantees.

Naloxone Training Categories

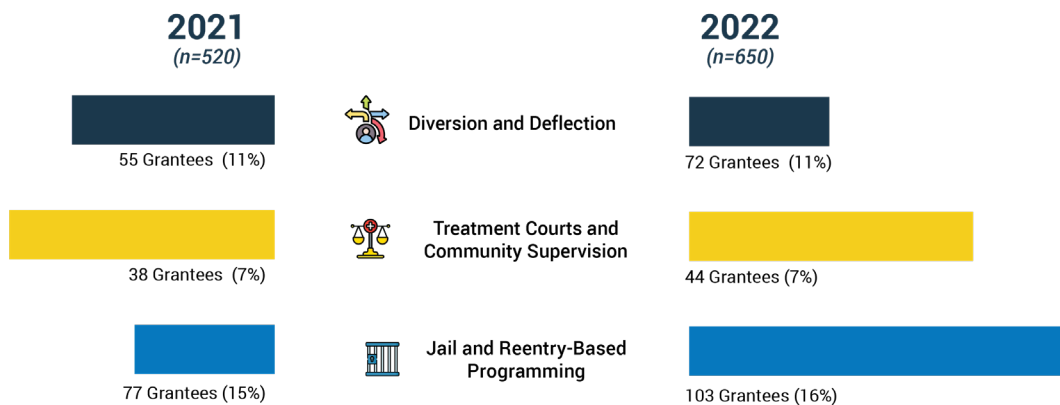

Law Enforcement (LE) led Programs

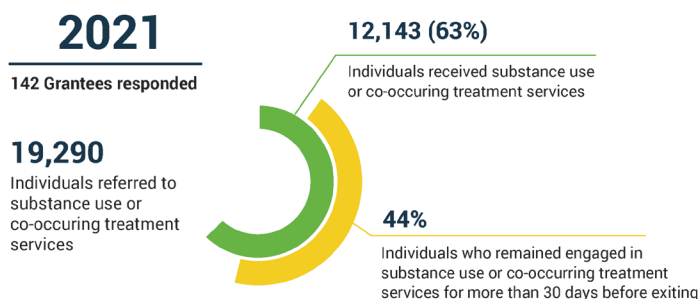

Disclaimer: This report includes data that was collected during the COVID-19 pandemic. Therefore, this report will avoid making statistical conclusions between 2021 and 2022. The grantee population, and its constituents, likely experienced a variety of circumstances that affected resources available, data collection, and reporting due to COVID-19. It is important to note that accurate data rely on correct data tracking and entry by the grantees and those agencies reporting to grantees, as such the data and analysis findings provided reflect the information as reported. These analytical findings make no claims of causation or demonstrate evidence of program effectiveness, and, as with all performance data, readers must use caution when interpreting the results, as factors other than the program may have contributed to the performance outcomes reported

This project is supported by Contract No. GS-00F-008DA awarded by the Office of Justice Programs. The Bureau of Justice Assistance is a component of the Department of Justice's Office of Justice Programs, which also includes the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, the Office for Victims of Crime, and the SMART Office. Points of view or opinions in this document are those of the author and do not necessarily represent the official position or policies of the U.S. Department of Justice.

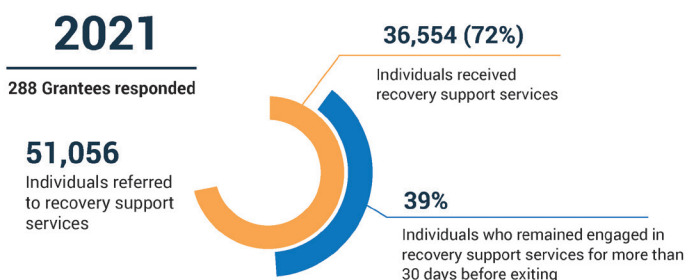

Key COSSUP Program Activities

Substance use treatment services are direct services to individuals experiencing substance use disorder. Services include inpatient, outpatient, partial hospitalization programs (PHP), inpatient withdrawal management, medication-assisted treatment (MAT), mental health treatment, and family therapy.

Recovery Support Services are a component of substance use treatment where individuals are provided additional contacts to mentorship such as recovery coaching and social support. They also receive essential social services such as housing, food, and vocational/educational training.

COSSUP Training and Technical Assistance Highlights

BJA has several training and technical assistance partners to support COSSUP grantees, subgrantees, and other stakeholders providing expertise, coaching, and training to save lives and build and sustain multidisciplinary criminal justice responses to illicit substance use and misuse. For further information please refer to the link provided below. (<https://www.cossup.org/>)

Conclusion

COSSUP funding has significantly contributed to the program's mission of promoting public safety and increasing access to substance use treatment and recovery support services. Over 54,000 individuals were referred to substance use treatment with 61 percent (over 32,000) enrolling in treatment. Also, over 131,000 individuals were referred to recovery support services with 72 percent (over 94,000) receiving services. Lastly, over 59,000 individuals from the general public were trained on the use of Naloxone.
