

Serve Warrant Process

Primary Flow

¹The entities to which Warrant Served Notification Messages are sent will vary by jurisdiction and implementation. For the purposes of this model any Entity that receives such notifications is referred to as a "Subscribing Entity."

²For the purposes of this model, it is only significant that the repository system receives notification of warrant service. How the repository system chooses to record this fact will be dependent on the jurisdiction and implementation.

³Notification of warrant service to NCIC will vary by the type of warrant, jurisdiction, and implementation.
