

BUREAU OF JUSTICE ASSISTANCE FACT SHEET

POSTCONVICTION TESTING OF DNA EVIDENCE

The Postconviction Testing of DNA Evidence Program funds projects that assist states and units of local government with postconviction DNA testing in cases of violent felony offenses where actual innocence might be demonstrated. This supports the Department of Justice's mission "to ensure fair and impartial administration of justice for all Americans." While successful exonerations to correct injustice are notable program outcomes, the careful review, consideration, and closing of cases subjected to postconviction DNA testing that do not ultimately demonstrate innocence also work to advance the public's interest that justice has been fairly applied.

Program Goals

The Bureau of Justice Assistance (BJA) Postconviction Testing of DNA Evidence Program aims to assist in:

1. Identifying potential postconviction DNA testing cases.
2. Reviewing appropriate postconviction cases to identify those in which DNA testing could prove the actual innocence of a person convicted of a violent felony offense as defined by state law.
3. Locating biological evidence associated with such postconviction cases.
4. Performing DNA analysis of appropriate biological evidence.
