The Michael Morton Act

The heart of SB 1611 is Sect. 2 (a) which reads: ". . . as soon as practicable after receiving a timely request from the defendant the state shall produce and permit the inspection and the electronic duplication, copying, and photography by or on behalf of the defendant, of any offense reports, any designated documents, papers, written or recorded statements of the defendant or a witness, including witness statements of law enforcement officers but not including the work product of counsel for the state in the case and their investigators and their notes or report or any designated books, accounts, letters, photographs, or objects or other tangible things not otherwise privileged that constitute or contain evidence material to any matter involved in the action and that are in the possession, custody, or control of the state or any person under contract with the state."

Sharing and Collaboration Capabilities

EVIDENCE.COM allows you to harness the power of collaboration within your agency with our sharing features. Set up permissions based on roles to determine who can share evidence and cases, and what a user can do with shared evidence. Remove the requirements to download, check in, check out, and transport physical media by implementing sharing of digital evidence within EVIDENCE.COM. EVIDENCE.COM also tracks all shared activity to maintain strict chain of custody over your digital evidence.

Manage Data Lifecycle

Not all data is created equal. Some needs to be retained forever, other data can be deleted quickly. EVIDENCE.COM gives you the ability to mark each piece of evidence with a deletion policy that's automatically executed without any manual intervention on your part. As data becomes more or less important to your agency, policies can be applied to manage it accordingly saving you endless hours managing these policies manually.

TASER AXON FLEX ON-OFFICER VIDEO EVIDENCE.COM

Securely Access Your Data From Anywhere

Because EVIDENCE.COM allows secure access through a web browser, data can be accessed wherever you are and completely on your terms. Lock down access to only from within your agency or allow access from courtrooms and at home. The choice is yours and EVIDENCE.COM gives you complete access control.

No matter how your agency chooses to access EVIDENCE.COM, we protect every login with 256 bit encryption and advanced security monitoring.

Create Customized User Permissions

EVIDENCE.COM allows you to fully customize and control access to your evidence through user maintained roles and permissions. This intuitive feature lets you decide who can see, download, redact, share and edit evidence while tracking all activity in an audit log that follows each piece of evidence. Customized roles allow you to specifically target permissions based on job requirements and need to access evidence, eliminating any unnecessary or incorrect access.

Chain of Custody Tracking and Auditability

EVIDENCE.COM gives your agency the confidence to know exactly what has occurred with every piece of digital evidence from archive to deletion. Detailed audit logs allow you to see every single transaction that has occurred, whether system or user caused. Summary information tracks total number of views, downloads and access attempts. Detailed information gives you time and date, user name, and action taken. Chain of custody features in EVIDENCE.COM insures your evidence remains secure and trusted.

TASER AXON FLEX ON-OFFICER VIDEO

FWPD GENERAL ORDERS

G.O. 506.04

 FORT WORTH POLICE DEPARTMENT 	
SPECIAL ORDER	GENERAL ORDER: 506.04 SUBJECT: Digital Recording System

General Order 506.04, Officer-Worn Digital Recording System, is a new order which addresses the emerging technology of officer-worn digital recording devices. These recordings can be useful for the documentation of evidence, preparation of offense reports, and future court testimony. These recordings may also be used to protect officers from false allegations of misconduct as well as provide training material for incident debriefing or performance evaluations. The provisions of this order are effective immediately.

506.04 OFFICER-WORN DIGITAL RECORDING SYSTEM

- A. The guidelines in this order apply to all officer-worn digital recording devices regardless of whether the device is owned by the department or personally-owned by the officer. These procedures do not apply to the use of in-car audio/video recording systems that are permanently mounted in a vehicle.
- B. All digital recordings that are captured during the scope of an officer's duties are property of the Fort Worth Police Department and are subject to policies regarding viewing, release, retention and destruction. Digital recordings shall not be converted for personal use. Accessing, copying, editing or releasing recordings or depictions of recordings without proper approval is strictly prohibited and subject to disciplinary actions.
- C. The use of a digital recording system by any officer is voluntary, however, if an officer elects to accept a digital recording system then the officer is required to use the system as outlined in this order. Officers utilizing a digital recording system shall use sound judgment and adhere to the following prohibitions:
1. Officers shall not intentionally create digital recordings of other employees in areas where a reasonable expectation of privacy exists such as locker rooms, restrooms, etc.
 2. Officers shall not knowingly record undercover officers or confidential informants.
 3. Officers shall not use a departmentally-owned officer-worn digital recording device to record any type of personal activities.
 4. Officer shall not allow citizens to review captured recordings without permission from the officer's immediate supervisor.
 5. Any uploading or converting recordings for use on any type of social media is strictly prohibited.
 6. Officers shall not intentionally capture video recordings of citizens while in patient care areas of a private hospital such as Harris, Baylor, or Cooks, etc. if the officer is asked not to record, unless it is a situation where the recording is instrumental in a criminal investigation i.e., dying declarations, Horizontal-Gaze-Nystagmus (HGN) on injured drivers, etc.
 7. Only the authorized digital recording brands approved by the Chief of Police shall be utilized.
- D. Officers deploying a departmentally-owned officer-worn digital recording device shall attend department approved training on the device, review the standard operating procedures governing use of the device and demonstrate a working knowledge of the device prior to employing the device in field operations.
1. Officers deploying a personal device shall demonstrate proficiency in the use of the device and retrieval of the recordings.
 2. Supervisors of officers deploying a departmentally-owned officer-worn digital recording device shall attend training regarding the device to be worn, as well as the procedures for storing and retention of recordings.
- E. Officers shall inspect the digital recording device prior to each shift to confirm proper operation, including sufficient battery life. Any problem with the recording device shall be reported to the officer's supervisor immediately and the supervisor will contact Training to secure a replacement or repair.
- F. Officers deploying a digital recording device should ensure the device is activated during potential enforcement activities and that the device continues to record until the incident is completed, the officer has left the scene, or the citizen contact is complete.
